### FEATURES

#### 100% Effective

A single treatment is able to eliminate all the eggs present and a very high proportion of the adult insects and larval stages.

#### Overheated dry steam up to 356° F

The flow of steam at 356° F is able to eliminate the adult insects, the larval stages and the eggs because it causes their thermal shock.

#### Chemical free

The superheated dry steam can even be delivered in the presence of people.
