## Who we are?

Business partners with a team of professional and entrepreneurial individuals who have diversified expertise covering various aspects of solar PV, who have in-depth knowledge that encompasses geographical, technological, policies of different states and financial aspects of solar PV in India. Our extensive and active network of industry professionals, experts, suppliers and contractors helps us to be competent technologically and financially viable implementation and service provider in the industry. Our knowledge driven, analytical and output-oriented approach has enabled us to successfully provide intelligence, project development, business consulting and strategic planning services to several large Indian and international clients.

## Who benefits from Sustainable Power?

Any Industries, commercial establishments, residences and private Hospitals who are concerned about increasing energy cost, rising fossil fuel prices, energy security and increase in climate change can play a key role in using this clean and inexhaustible green energy.

## Solar Roof Top models:

### OpEx Model

We have investors who are interested to invest in viable solar PV installation for captive consumption of the roof owner.

### CapEx Model

Industries, commercial establishments and residential complexes / residences can invest and our team will do the end to end installation and liasoning activities.

## We provide the following development support services:

- Power Purchase Agreement (PPA)
- Government Order (GO)
- Procurement of Land and related activities
- Liasoning with agencies
- Right of Way and Transmission Lines

## Value Added Services includes:

- Budgeting: Pro-forma analysis, forecasting, cash flows
- Risk Analysis: Cost benefits, project scheduling
- PPA: Negotiation support, scheduling & risk analysis
- General: Single-Line, plant modeling, feasibility system impact – facility study
- Site Evaluation: Assessment, soil testing, site topology, geotechnical features, wetlands, interconnection locations.
- Environmental: Permits if required

## Commercial-Scale Solar Turnkey Services

We bring large-scale solar to commercial and industrial businesses and institutions in India. We do it all from the ground, to your roof, or elevated above your parking lot. New innovations in technology, solar-friendly utility programs in our country and the maturation of the industry continue to open up more opportunities to develop commercial-scale solar energy projects. Customers can decide between a megawatt scale ground-mounted or a roof-mounted system depending on the customer's goal for investing in solar.

## Operations & Maintenance Services

When we build solar PV systems, we want to ensure that they are maintained properly throughout its life, ensuring that the assets are performing to the best of their ability. We offer turn-key services to our clients to protect, monitor and service their solar assets, be it ground mounted or roof top.
